Portfolio: <https://jsheen98.github.io/personal-portfolio/>

Highly motivated, organized, and efficient Full Stack Developer with experience in designing dynamic frontend web pages, using web APIs, creating backend APIs and servers, using databases to store relevant project models. Thrives in group settings or working alone. Also enjoys critical thinking, problem solving, and diagnosing issues. Looking to grow full stack development skills in an innovative work environment, alongside an efficient and passionate team.

Technical Skills

Fullstack: JavaScript, JQuery, Python, Git, GitHub, Unit Tests, Debugging, OOP, MVC
Frontend: HTML, CSS, Bootstrap, Bulma, Responsive Design, APIs, Requests, Forms
Backend: MySQL, Express, Node.js, Handlebars, Sequelize, Responses

Projects

Tech Blog | <https://github.com/JSheen98/tech-blog> | <https://safe-ridge-72471.herokuapp.com/>
Sole Creator

- Web app that allows user to create and view blog posts
- This fullstack project showcases the use of MVC paradigm, and its importance for a web app from frontend to backend. It also features secure session browsing with login and sign up functionality.
- Tools/Languages: JavaScript, Node, Express, Handlebars, MySQL, Bootstrap

Weather Dashboard | <https://github.com/JSheen98/weather-dashboard> | <https://jsheen98.github.io/weather-dashboard/>
Sole Creator

- Web app that allows a user to search for a location and view the weekly forecast
- This frontend project features the use of Open Weather Map APIs to find a location through search, and give the projected forecast.
- Tools/Languages: JavaScript, HTML, CSS, JQuery, Open Weather Map API

SVG Logo Generator | <https://github.com/JSheen98/svg-logo-maker>
Sole Creator

- Command Line Application that creates SVG files based off user input
- This backend project shows off the use of Inquirer through the CLI, and with the given user input, an SVG file is generated with that data.
- Tools/Languages: JavaScript, Node.js, Jest, SVG files, File System package

Musinion | <https://musinion.herokuapp.com/>
Team Coordinator

- Web app that allows a user to login or sign up, write album reviews, and leave notes to other reviewers
- This fullstack application showcases user authentication/session-based browsing, and uses the relational database, MySQL. It features a polished frontend that works seamlessly with a well structured backend.
- Tools/Languages: JavaScript, Node, Express, Handlebars, MySQL, Sequelize, Bootstrap

Work Experience

iFIT	November 2020 - Current
Software Tester 2	Logan, Utah
